EDNALITE  
OCVI\* RATED  
VISUAL AMPLIFICATION  
and  
ILLUMINATION Instruments

Dear Mr. Nelson:

Recently, at your request, we submitted information to you on these newly created instruments.

We hope that this descriptive material reached you in good order.

These precision instruments were conceived to fill a vital need where eye-assists, with properly prescribed quality of performance, are indicated. Most often such need is not obvious and, eventually, it makes itself felt through problems involving eye-strain, tension and fatigue, accompanied by consistently low levels of quality control and reduced production performance.

In this age of miniaturization, we are all working with more concentration, looking at smaller, more complicated work tasks. For this reason, EDNALITE OCVI\* Rated Instruments, when properly prescribed, will minimize the human visual problems dealing with performance requirements in these areas.

We want to be of further assistance to you. Our Technical Staff -- here and in the field -- are at your disposal.

May we hear from you further?

Sincerely,

THE EDNALITE CORPORATION  
OCVI\* Instrument Division
